4B

Pascual 12:46 PM

4A + 4B SUBMISSION EVIDENCE

4A

CS077 / VOID RUNNERS / WEEK 4

Action Record 4A: Build the Receiver

Complete in class with the instructor. Tutorial 1-3. Advance the same Week 4 project.

Build

Build the WFF controls, connect Scan batch, and use a loop and counter. At this checkpoint the default batch counts all five labels; sentinel behavior comes in 4B.

Whiteboard

Trace three loop passes. Name the input, index, counter, output and the unknown STOP behavior.

Collaborate

Compare your running output with a partner and share a cropped screenshot plus the whiteboard photo in the course Discord.

Return

Save the code checkpoint to Git and push. Submit the repository link with your meeting evidence through Action 4A as directed in class. Both 4A and 4B require instructor acceptance before Week 4 is accepted for grading. Reuse this evidence in the weekly repository.

The instructor must verify active participation in this scheduled meeting. A Canvas upload alone does not establish attendance or earn the Action Point. Submit at the announced class close.

4B

CS077 / VOID RUNNERS / WEEK 4

Action Record 4B: Stop, Test and Relay

Complete in class with the instructor. Tutorial 4-6. Advance the same Week 4 project.

Build

Recap 4A, add STOP and the six packet cap, run all five cases, and attempt the AI reset button addition. Preserve a working core.

Whiteboard

Extend the same trace with STOP first, missing STOP, and the six item boundary. Explain what each stopping rule protects.

Collaborate

Peer test a boundary case, discuss the AI result/error and next test, and preserve a concise course Discord record.

Return

Push the enhanced project and evidence. Submit its repository link through Action 4B. Both 4A and 4B require instructor acceptance before Week 4 is accepted for grading. Reuse this evidence and finish the same application's weekly submission in tutorial 7.

The instructor must verify active participation in this scheduled meeting. A Canvas upload alone does not establish attendance or earn the Action Point. Submit at the announced class close.
