

CHECK AI AND COLLABORATE

Requirement 07

AI // CHATGPT

The key idea

I think your strongest point in class could be:

"The goal isn't just to understand the process. The goal is to make the process usable."

And then take it one step further:

"Application makes the idea personal. Action makes it real. Amplification makes it useful beyond me."

That gives you a much deeper answer than simply explaining what each condition in the original example means.

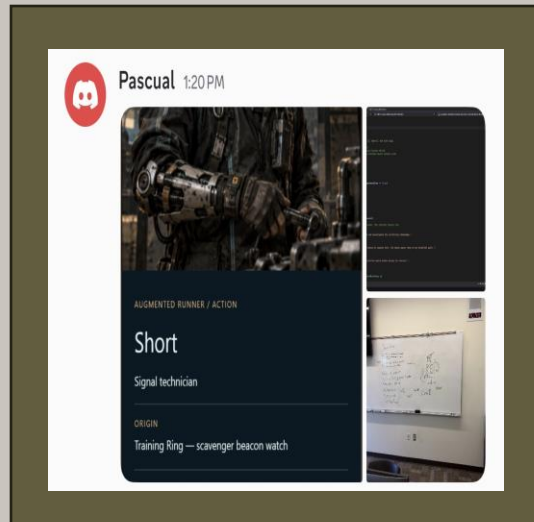

CHATGPT

I probed more conceptual questions to CHATGPT on Professor Malik's book rather than the code itself. The understanding that I concluded from the conversation will lead to an improvement in overall AI personal use moving forward.

IN CLASS WORK + DISCORD

SUBMISSION

Collaborative effort with my partner Vinh for this week's module. We constructed Short's story in class and tested code while in class to complete the assignment. I continued the effort using AI to help me with questions I had regarding the code itself.

MISSION CLEARED

MISSION CLEARED

GOAL: Successfully completing all 3 checklist items will return a CLEAR message.

CLEAR
