Week 1 Training Ring Record x Command Nexus

courses.addp2p.com/courses/cs077/week1

Week 1 submission checklist

Copy the full checklist for Discord, notes, or another workspace.

STARRED REQUIREMENTS

Canvas lists the assignment point total. A star marks an essential requirement. Every starred item must be submitted and easy to locate. A starred item may limit the entire assignment to no more than 1 point under the syllabus rule.

01	★ Complete First Contact and save the receipt Finish the cinematic or static route, generate the Runner Entry Receipt, save it outside the browser, and verify that it reopens.	02	★ Build the recoverable CS077 works Show CS077-Fall-2026 with 00-Course-Info, 01-Training-Ring/source, evidence, submission, Systems-Online, and recovery. An equivalent scheme is acceptable when approved.
03	Map the course-system handoff Show how work moves from Canvas to the CS077 Nexus, into the local workspace, and back to the official Canvas submission. Add any media, support, or alternate route you used.	04	★ Trace the impossible timestamp Name the inputs, process, output, and test case and one conflicting case in plain language format supplied in class.
05	★ Record expected and observed results For each test, state what should happen, what actually happened, and what the result says about the original claim.	06	Explain the verification decision Write a short note identifying the evidence, claim you changed or rejected, and any uncertainty remains. If AI assisted, include the requested without private information.
