

Impossible Timestamp Logic Trace

SITUATION 01	INPUT 02	PROCESS 03	OUTPUT 04	TEST 05
The recovered courier record appears to place Orra Quill on two worlds during the same hour. Do not decide whether the claim is true until you trace and test the evidence.	List the records, timestamps, locations, identifiers, and source details available to the process.	Write the comparison in plain-language steps or the starter format supplied in class.	State what the process should report when the records agree and when they conflict.	Normal case vs. Conflicting case.
VERIFICATION DECISION	What claim did you keep, change, reject, or leave uncertain? Name the evidence and test result behind your decision. If AI assisted, include the work record required in Canvas without passwords, private messages, disability information, or unrelated personal data.		TRACE THE IMPOSSIBLE LOGIC TIMESTAMP	

WHERE IS ORRA QUILL?
